

Key features

Take a look at some of the key features Nuxeo provides to help you tackle the toughest challenges of today and tomorrow.

Cloud-native product

Nuxeo works how and where you want it to. Keep your information secure with a cloud-first product trusted by some of the world's largest companies.

Scalability and performance

Cloud-first, modular architecture scales horizontally and independently, matching even the heaviest workloads in real time to deliver high performance.

Workflows

Workflow management and automation systems can deliver the business efficiencies today's enterprises require to remain competitive.

Adaptable AI

Nuxeo Insight empowers smarter predictions without a team of data scientists. Business-specific artificial intelligence is just a few clicks away.

Digital asset management capabilities

Place rich media assets at the center of the digital supply chain and connect data and information across the organization.

Extensibility

Nuxeo features an extensive, document-oriented REST to create, query and manage a command-oriented API for complex content interactions.

Meet Nuxeo

Take advantage of trainable AI, modular architecture and the cloud — with a low-code development environment — to put your teams back in control of your content and information.
